The reports shall be submitted to the Secretary of the Treasury, the Committee on Transportation and Infrastructure and the Committee on Ways and Means of the House of Representatives, and the Committee on Environment and Public Works and the Committee on Finance of the Senate.

(d) **AUTHORIZATION OF APPROPRIATION.**—

(1) **IN GENERAL.**—There is authorized to be appropriated from the Highway Trust Fund (other than the Mass Transit Account) to carry out this section \$2,000,000 fiscal year 2006 and \$3,500,000 for each of fiscal years 2007, 2008, and 2009.

(2) **CONTRACT AUTHORITY.**—Funds authorized under this subsection shall be available for obligation in the same manner as if the funds were apportioned under chapter 1 of title 23, United States Code; except the Federal share of the cost of the analysis and report shall be 100 percent, and such funds shall remain available until expended and shall not be transferable.

SEC. 1920. TRANSPORTATION AND LOCAL WORKFORCE INVESTMENT.

(a) **FINDINGS.**—Congress finds the following:

(1) Federal-aid highway programs provide State and local governments and other recipients substantial funds for projects that produce significant employment and job-training opportunities.

(2) Every \$1,000,000,000 in Federal infrastructure investment creates an estimated 47,500 jobs.

(3) Jobs in transportation construction, including apprenticeship positions, typically pay more than twice the minimum wage, and include health and other benefits.

(4) Transportation projects provide the impetus for job training and employment opportunities for low income individuals residing in the area in which a transportation project is planned.

(5) Transportation projects can offer young people, particularly those who are economically disadvantaged, the opportunity to gain productive employment.

(6) The Alameda Corridor, a \$2,400,000,000 transportation project, is an example of a transportation project that included a local hiring provision resulting in a full 30 percent of the project jobs being filled by locally hired and trained men and women.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that Federal transportation projects should facilitate and encourage the collaboration between interested persons, including Federal, State, and local governments, community colleges, apprentice programs, local high schools, and other community-based organizations that have an interest in improving the job skills of low-income individuals, to help leverage scarce training and community resources and to help ensure local participation in the building of transportation projects.

SEC. 1924. ALASKA WAY VIADUCT STUDY.

(a) FINDINGS.—Congress finds that—

(1) in 2001, the Alaska Way Viaduct, a critical segment of the National Highway System in Seattle, Washington, was seriously damaged by the Nisqually earthquake;

(2) an effort to address the possible repair, retrofit, or replacement of the Viaduct that conforms with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) is underway; and

(3) as a result of the efforts referred to in paragraph (2), a locally preferred alternative for the Viaduct is being developed.

(2) the positive economic, cultural, aesthetic, scenic, architectural, and environmental benefits of such projects for communities.

(b) CONTENTS.—The study shall address the following:

(1) The degree to which well-designed transportation projects have positive economic, cultural, aesthetic, scenic, architectural, and environmental benefits for communities.

(3) The degree to which such projects use inclusive public participation processes to achieve quicker, more certain, and better results.

(4) The degree to which positive results are achieved by linking transportation, design, and the implementation of community visions for the future.

(5) Facilitating the use of successful models or best practices in transportation investment or development to accomplish each of the following:

funding necessary to construct a route for the 14th Amendment Highway, from Augusta, Georgia, to Natchez, Mississippi (formerly designated the Fall Line Freeway in the State of Georgia); and

It is the sense of Congress that—

(1) the Buy America test required by section 165 of the Surface Transportation Assistance Act of 1982 (23 U.S.C. 101 note) needs to be applied to an entire bridge project and not only to component parts of such project;

(2) the law clearly states that domestic materials must be used in Federal highway projects unless there is a finding that the inclusion of domestic materials will increase the cost of the overall project by more than 25 percent;

(3) uncertainty regarding how to apply Buy America laws for major bridge projects threatens the domestic bridge industry;

(4) because the Nation's unemployment rate continues to hover around 5.6 percent, steps are needed to protect American workers and the domestic bridge building industry; and

(5) the Buy American Act (41 U.S.C. 10a et seq.) was designed to ensure that, when taxpayer money is spent on direct Federal Government procurement and infrastructure projects, these expenditures stimulate United States production and job creation.

SEC. 2020. PRESIDENTIAL COMMISSION ON ALCOHOL-IMPAIRED DRIVING.

(a) FINDINGS.—Congress finds that—

(1) there has been considerable progress over the past 25 years in reducing the number and rate of alcohol-related highway fatalities;

(2) the National Highway Traffic Safety Administration projects that fatalities in alcohol-related crashes declined in 2003 for the 2nd year in a row;

(3) in spite of this progress, an estimated 17,013 Americans died in 2003, in alcohol-related crashes;

(4) these fatalities comprise 40 percent of the annual total highway fatalities;

(5) about 250,000 are injured each year in alcohol-related crashes;

(6) the past 2 years of decreasing alcohol-related fatalities follows a 3-year increase;

(7) alcohol-impaired driving is the Nation’s most frequently committed violent crime;

(8) the annual cost of alcohol-related crashes is over \$100,000,000,000, including \$9,000,000,000 in costs to employers;

(9) a Presidential Commission on Alcohol Impaired Driving in 1982 and 1983 helped to lead to substantial progress on this issue; and

(10) these facts point to the need to renew the national commitment to preventing these deaths and injuries.

(b) SENSE OF THE CONGRESS.—It is the sense of Congress that, in an effort to further change the culture of alcohol-impaired driving on our Nation’s highways, the President should consider establishing a Presidential Commission on Alcohol-Impaired Driving—

(1) in 2003—

(A) 17,013 Americans died in alcohol-related traffic crashes;

(B) 40 percent of the persons killed in traffic crashes died in alcohol-related crashes; and

(C) drivers with blood alcohol concentration levels over 0.15 were involved in 58 percent of alcohol-related traffic fatalities;

(2) research shows that 77 percent of Americans think they have received enough information about alcohol-impaired driving and the way in which alcohol affects individual blood alcohol levels; and

(3) only 28 percent of the American public can correctly identify the legal limit of blood alcohol concentration of the State in which they reside.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that the National Highway Traffic Safety Administration should work with State and local governments and independent organizations to increase public awareness of—

(1) State legal limits on blood alcohol concentration levels; and

(2) the dangers of alcohol-impaired driving.

SEC. 5103. FINDINGS.

Congress finds the following:

(1) Research and development are critical to developing and maintaining a transportation system that meets the goals of safety, mobility, economic vitality, efficiency, equity, and environmental protection.

(2) Federally sponsored surface transportation research and development has produced many successes. The development of rumble strips has increased safety; research on materials has increased the lifespan of pavements, saving money and reducing the disruption caused by construction; and Geographic Information Systems have improved the management and efficiency of transit fleets.

(3) Despite these important successes, the Federal surface transportation research and development investment represents less than 1 percent of overall Government spending on surface transportation.

(4) While Congress increased funding for overall transportation programs by about 40 percent in the Transportation Equity Act for the 21st Century, funding for transportation research and development remained relatively flat.

(5) The Federal investment in research and development should be balanced between short-term applied and long-term fundamental research and development. The investment should also cover a wide range of research areas, including research on materials and construction, research on operations, research on transportation trends and human factors, and research addressing the institutional barriers to deployment of new technologies.

(6) That it is in the United States interest to increase the Federal investment in transportation research and development, and to conduct research in critical research gaps, in order to ensure that the transportation system meets the goals of safety, mobility, economic vitality, efficiency, equity, and environmental protection.

Aug. 11, 2005
[H.R. 1132]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “National All Schedules Prescription Electronic Reporting Act of 2005”.

SEC. 2. PURPOSE.

It is the purpose of this Act to—

(1) foster the establishment of State-administered controlled substance monitoring systems in order to ensure that health care providers have access to the accurate, timely prescription history information that they may use as a tool for the early identification of patients at risk for addiction in order to initiate appropriate medical interventions and avert the tragic personal, family, and community consequences of untreated addiction; and

(2) establish, based on the experiences of existing State controlled substance monitoring programs, a set of best practices to guide the establishment of new State programs and the improvement of existing programs.

SEC. 3. CONTROLLED SUBSTANCE MONITORING PROGRAM.

Part P of title III of the Public Health Service Act (42 U.S.C. 280g et seq.) is amended by adding after section 399N the following:

“SEC. 399O. CONTROLLED SUBSTANCE MONITORING PROGRAM.

42 USC 280g–3.

“(a) GRANTS.—

“(1) IN GENERAL.—Each fiscal year, the Secretary shall award a grant to each State with an application approved under this section to enable the State—

“(A) to establish and implement a State controlled substance monitoring program; or

“(B) to make improvements to an existing State controlled substance monitoring program.

“(2) DETERMINATION OF AMOUNT.—

“(A) MINIMUM AMOUNT.—In making payments under a grant under paragraph (1) for a fiscal year, the Secretary shall allocate to each State with an application approved under this section an amount that equals 1.0 percent of the amount appropriated to carry out this section for that fiscal year.

note.

“(B) ADDITIONAL AMOUNTS.—In making payments under a grant under paragraph (1) for a fiscal year, the Secretary shall allocate to each State with an application approved under this section an additional amount which bears the same ratio to the amount appropriated to carry out this section for that fiscal year and remaining after amounts are made available under subparagraph (A) as the number of pharmacies of the State bears to the number of pharmacies of all States with applications approved under this section (as determined by the Secretary), except that the Secretary may adjust the amount allocated to a State under this subparagraph after taking into consideration the budget cost estimate for the State’s controlled substance monitoring program.

“(3) TERM OF GRANTS.—Grants awarded under this section shall be obligated in the year in which funds are allotted.

Deadline.
Federal Register,
publication.

“(b) DEVELOPMENT OF MINIMUM REQUIREMENTS.—Prior to awarding a grant under this section, and not later than 6 months after the date on which funds are first appropriated to carry out this section, after seeking consultation with States and other interested parties, the Secretary shall, after publishing in the Federal Register proposed minimum requirements and receiving public comments, establish minimum requirements for criteria to be used by States for purposes of clauses (ii), (v), (vi), and (vii) of subsection (c)(1)(A).

“(c) APPLICATION APPROVAL PROCESS.—

“(1) IN GENERAL.—To be eligible to receive a grant under this section, a State shall submit an application to the Secretary at such time, in such manner, and containing such assurances and information as the Secretary may reasonably require. Each such application shall include—

“(A) with respect to a State that intends to use funds under the grant as provided for in subsection (a)(1)(A)—

“(i) a budget cost estimate for the controlled substance monitoring program to be implemented under the grant;

“(ii) criteria for security for information handling and for the database maintained by the State under subsection (e) generally including efforts to use appropriate encryption technology or other appropriate technology to protect the security of such information;

“(iii) an agreement to adopt health information interoperability standards, including health vocabulary and messaging standards, that are consistent with any such standards generated or identified by the Secretary or his or her designee;

“(iv) criteria for meeting the uniform electronic format requirement of subsection (h);

“(v) criteria for availability of information and limitation on access to program personnel;

“(vi) criteria for access to the database, and procedures to ensure that information in the database is accurate;

“(vii) criteria for the use and disclosure of information, including a description of the certification process to be applied to requests for information under subsection (f);

“(viii) penalties for the unauthorized use and disclosure of information maintained in the State controlled substance monitoring program in violation of applicable State law or regulation;

“(ix) information on the relevant State laws, policies, and procedures, if any, regarding purging of information from the database; and

“(x) assurances of compliance with all other requirements of this section; or

“(B) with respect to a State that intends to use funds under the grant as provided for in subsection (a)(1)(B)—

“(i) a budget cost estimate for the controlled substance monitoring program to be improved under the grant;

“(ii) a plan for ensuring that the State controlled substance monitoring program is in compliance with the criteria and penalty requirements described in clauses (ii) through (viii) of subparagraph (A);

“(iii) a plan to enable the State controlled substance monitoring program to achieve interoperability with at least one other State controlled substance monitoring program; and

“(iv) assurances of compliance with all other requirements of this section or a statement describing why such compliance is not feasible or is contrary to the best interests of public health in such State.

“(2) STATE LEGISLATION.—As part of an application under paragraph (1), the Secretary shall require a State to demonstrate that the State has enacted legislation or regulations to permit the implementation of the State controlled substance monitoring program and the imposition of appropriate penalties for the unauthorized use and disclosure of information maintained in such program.

“(3) INTEROPERABILITY.—If a State that submits an application under this subsection geographically borders another State that is operating a controlled substance monitoring program under subsection (a)(1) on the date of submission of such application, and such applicant State has not achieved interoperability for purposes of information sharing between its monitoring program and the monitoring program of such border State, such applicant State shall, as part of the plan under paragraph (1)(B)(iii), describe the manner in which the applicant State will achieve interoperability between the monitoring programs of such States.

“(4) APPROVAL.—If a State submits an application in accordance with this subsection, the Secretary shall approve such application.

“(5) RETURN OF FUNDS.—If the Secretary withdraws approval of a State’s application under this section, or the State chooses to cease to implement or improve a controlled substance monitoring program under this section, a funding agreement for the receipt of a grant under this section is that the State will return to the Secretary an amount which bears the same ratio to the overall grant as the remaining time period for expending the grant funds bears to the overall time period for expending the grant (as specified by the Secretary at the time of the grant).

“(d) REPORTING REQUIREMENTS.—In implementing or improving a controlled substance monitoring program under this section, a State shall comply, or with respect to a State that applies for a grant under subsection (a)(1)(B) submit to the Secretary for approval a statement of why such compliance is not feasible or is contrary to the best interests of public health in such State, with the following:

“(A) shall establish a program to notify practitioners and dispensers of information that will help identify and prevent the unlawful diversion or misuse of controlled substances; and

“(B) may, to the extent permitted under State law, notify the appropriate authorities responsible for carrying out drug diversion investigations if the State determines that information in the database maintained by the State under subsection (e) indicates an unlawful diversion or abuse of a controlled substance.

“(g) LIMITATIONS.—In implementing or improving a controlled substance monitoring program under this section, a State—

“(1) shall limit the information provided pursuant to a valid request under subsection (f)(1) to the minimum necessary to accomplish the intended purpose of the request; and

“(B) submit a report to the Congress on the results of the study.

An Act

To prohibit civil liability actions from being brought or continued against manufacturers, distributors, dealers, or importers of firearms or ammunition for damages, injunctive or other relief resulting from the misuse of their products by others.

Oct. 26, 2005
[S. 397]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Protection of Lawful Commerce in Arms Act”.

Protection of
Lawful
Commerce in
Arms Act.
15 USC 7901
note.

SEC. 2. FINDINGS; PURPOSES.

15 USC 7901.

(a) **FINDINGS.**—Congress finds the following:

(1) The Second Amendment to the United States Constitution provides that the right of the people to keep and bear arms shall not be infringed.

(2) The Second Amendment to the United States Constitution protects the rights of individuals, including those who are not members of a militia or engaged in military service or training, to keep and bear arms.

(3) Lawsuits have been commenced against manufacturers, distributors, dealers, and importers of firearms that operate as designed and intended, which seek money damages and other relief for the harm caused by the misuse of firearms by third parties, including criminals.

(4) The manufacture, importation, possession, sale, and use of firearms and ammunition in the United States are heavily regulated by Federal, State, and local laws. Such Federal laws include the Gun Control Act of 1968, the National Firearms Act, and the Arms Export Control Act.

(5) Businesses in the United States that are engaged in interstate and foreign commerce through the lawful design, manufacture, marketing, distribution, importation, or sale to the public of firearms or ammunition products that have been shipped or transported in interstate or foreign commerce are not, and should not, be liable for the harm caused by those who criminally or unlawfully misuse firearm products or ammunition products that function as designed and intended.

(6) The possibility of imposing liability on an entire industry for harm that is solely caused by others is an abuse of the legal system, erodes public confidence in our Nation’s laws, threatens the diminution of a basic constitutional right and civil liberty, invites the disassembly and destabilization of other industries and economic sectors lawfully competing

in the free enterprise system of the United States, and constitutes an unreasonable burden on interstate and foreign commerce of the United States.

(7) The liability actions commenced or contemplated by the Federal Government, States, municipalities, and private interest groups and others are based on theories without foundation in hundreds of years of the common law and jurisprudence of the United States and do not represent a bona fide expansion of the common law. The possible sustaining of these actions by a maverick judicial officer or petit jury would expand civil liability in a manner never contemplated by the framers of the Constitution, by Congress, or by the legislatures of the several States. Such an expansion of liability would constitute a deprivation of the rights, privileges, and immunities guaranteed to a citizen of the United States under the Fourteenth Amendment to the United States Constitution.

(8) The liability actions commenced or contemplated by the Federal Government, States, municipalities, private interest groups and others attempt to use the judicial branch to circumvent the Legislative branch of government to regulate interstate and foreign commerce through judgments and judicial decrees thereby threatening the Separation of Powers doctrine and weakening and undermining important principles of federalism, State sovereignty and comity between the sister States.

(b) PURPOSES.—The purposes of this Act are as follows:

(1) To prohibit causes of action against manufacturers, distributors, dealers, and importers of firearms or ammunition products, and their trade associations, for the harm solely caused by the criminal or unlawful misuse of firearm products or ammunition products by others when the product functioned as designed and intended.

(2) To preserve a citizen's access to a supply of firearms and ammunition for all lawful purposes, including hunting, self-defense, collecting, and competitive or recreational shooting.

(3) To guarantee a citizen's rights, privileges, and immunities, as applied to the States, under the Fourteenth Amendment to the United States Constitution, pursuant to section 5 of that Amendment.

(4) To prevent the use of such lawsuits to impose unreasonable burdens on interstate and foreign commerce.

(5) To protect the right, under the First Amendment to the Constitution, of manufacturers, distributors, dealers, and importers of firearms or ammunition products, and trade associations, to speak freely, to assemble peaceably, and to petition the Government for a redress of their grievances.

(6) To preserve and protect the Separation of Powers doctrine and important principles of federalism, State sovereignty and comity between sister States.

(7) To exercise congressional power under article IV, section 1 (the Full Faith and Credit Clause) of the United States Constitution.

15 USC 7902.

SEC. 3. PROHIBITION ON BRINGING OF QUALIFIED CIVIL LIABILITY ACTIONS IN FEDERAL OR STATE COURT.

(c) MANAGEMENT OF WILDERNESS.—Subject to valid existing rights, the wilderness area designated by this Act shall be managed by the Secretary in accordance with the Wilderness Act (16 U.S.C. 1131 et seq.) and this Act, except that, with respect to the wilderness area designated by this Act, any reference in the Wilderness Act to the effective date of the Wilderness Act shall be deemed to be a reference to the date of enactment of this Act.

(d) **MANAGEMENT OF NEWLY ACQUIRED LAND.**—If acquired by the United States, the following land shall become part of the wilderness area designated by this Act and shall be managed in accordance with this Act and other applicable law:

(1) Section 12 of township 15 north, range 01 west, New Mexico Principal Meridian.

(2) Any land within the boundaries of the wilderness area designated by this Act.

(e) **MANAGEMENT OF LANDS TO BE ADDED.**—The lands generally depicted on the map as “Lands to be Added” shall become part of the wilderness area designated by this Act if the United States acquires, or alternative adequate access is available to, section 12 of township 15 north, range 01 west, New Mexico Principal Meridian.

(f) **RELEASE.**—The Congress hereby finds and directs that the lands generally depicted on the map as “Lands to be Released” have been adequately studied for wilderness designation pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) and no longer are subject to the requirement of section 603(c) of such Act (43 U.S.C. 1782(c)) pertaining to the management of wilderness study areas in a manner that does not impair the suitability of such areas for preservation as wilderness.

(g) **GRAZING.**—Grazing of livestock in the wilderness area designated by this Act, where established before the date of enactment of this Act, shall be administered in accordance with the provisions of section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)) and the guidelines set forth in Appendix A of the Report of the Committee on Interior and Insular Affairs to accompany H.R. 2570 of the One Hundred First Congress (H. Rept. 101-405).

(h) **FISH AND WILDLIFE.**—As provided in section 4(d)(7) of the Wilderness Act (16 U.S.C. 1133(d)(7)), nothing in this section shall be construed as affecting the jurisdiction or responsibilities of the State with respect to fish and wildlife in the State.

(i) **WATER RIGHTS.**—

(1) **FINDINGS.**—Congress finds that—

(A) the land designated as wilderness by this Act is arid in nature and is generally not suitable for use or development of new water resource facilities; and

(B) because of the unique nature and hydrology of the desert land designated as wilderness by this Act, it is possible to provide for proper management and protection of the wilderness and other values of lands in ways different from those used in other legislation.

(2) **STATUTORY CONSTRUCTION.**—Nothing in this Act—

(A) shall constitute or be construed to constitute either an express or implied reservation by the United States of any water or water rights with respect to the land designated as wilderness by this Act;

An Act

To amend the Foreign Assistance Act of 1961 to provide assistance for orphans and other vulnerable children in developing countries, and for other purposes.

Nov. 8, 2005
[H.R. 1409]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Assistance for Orphans and Other Vulnerable Children in Developing Countries Act of 2005”.

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) As of July 2004, there were more than 143,000,000 children living in sub-Saharan Africa, Asia, Latin America, and the Caribbean who were identified as orphans, having lost one or both of their parents. Of this number, approximately 16,200,000 children were identified as double orphans, having lost both parents—the vast majority of whom died of AIDS. These children often are disadvantaged in numerous and devastating ways and most households with orphans cannot meet the basic needs of health care, food, clothing, and educational expenses.

(2) It is estimated that 121,000,000 children worldwide do not attend school and that the majority of such children are young girls. According to the United Nations Children’s Fund (UNICEF), orphans are less likely to be in school and more likely to be working full time.

(3) School food programs, including take-home rations, in developing countries provide strong incentives for children to remain in school and continue their education. School food programs can reduce short-term hunger, improve cognitive functions, and enhance learning, behavior, and achievement.

(4) Financial barriers, such as school fees and other costs of education, prevent many orphans and other vulnerable children in developing countries from attending school. Providing children with free primary school education, while simultaneously ensuring that adequate resources exist for teacher training and infrastructure, would help more orphans and other vulnerable children obtain a quality education.

(5) The trauma that results from the loss of a parent can trigger behavior problems of aggression or emotional withdrawal and negatively affect a child’s performance in school and the child’s social relations. Children living in families affected by HIV/AIDS or who have been orphaned by AIDS

often face stigmatization and discrimination. Providing culturally appropriate psychosocial support to such children can assist them in successfully accepting and adjusting to their circumstances.

(6) Orphans and other vulnerable children in developing countries routinely are denied their inheritance or encounter difficulties in claiming the land and other property which they have inherited. Even when the inheritance rights of women and children are spelled out in law, such rights are difficult to claim and are seldom enforced. In many countries it is difficult or impossible for a widow, even if she has young children, to claim property after the death of her husband.

(7) The HIV/AIDS pandemic has had a devastating affect on children and is deepening poverty in entire communities and jeopardizing the health, safety, and survival of all children in affected areas.

(8) The HIV/AIDS pandemic has increased the number of orphans worldwide and has exacerbated the poor living conditions of the world's poorest and most vulnerable children. AIDS has created an unprecedented orphan crisis, especially in sub-Saharan Africa, where children have been hardest hit. An estimated 14,000,000 orphans have lost 1 or both parents to AIDS. By 2010, it is estimated that over 25,000,000 children will have been orphaned by AIDS.

(9) Approximately 2,500,000 children under the age of 15 worldwide have HIV/AIDS. Every day another 2,000 children under the age of 15 are infected with HIV. Without treatment, most children born with HIV can expect to die by age two, but with sustained drug treatment through childhood, the chances of long-term survival and a productive adulthood improve dramatically.

(10) Few international development programs specifically target the treatment of children with HIV/AIDS in developing countries. Reasons for this include the perceived low priority of pediatric treatment, a lack of pediatric health care professionals, lack of expertise and experience in pediatric drug dosing and monitoring, the perceived complexity of pediatric treatment, and mistaken beliefs regarding the risks and benefits of pediatric treatment.

(11) Although a number of organizations seek to meet the needs of orphans or other vulnerable children, extended families and local communities continue to be the primary providers of support for such children.

(12) The HIV/AIDS pandemic is placing huge burdens on communities and is leaving many orphans with little support. Alternatives to traditional orphanages, such as community-based resource centers, continue to evolve in response to the massive number of orphans that has resulted from the pandemic.

(13) The AIDS orphans crisis in sub-Saharan Africa has implications for political stability, human welfare, and development that extend far beyond the region, affecting governments and people worldwide, and this crisis requires an accelerated response from the international community.

(14) Although section 403(b) of the United States Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003 (22 U.S.C. 7673(b)) establishes the requirement that not less

than 10 percent of amounts appropriated for HIV/AIDS assistance for each of fiscal years 2006 through 2008 shall be expended for assistance for orphans and other vulnerable children affected by HIV/AIDS, there is an urgent need to provide assistance to such children prior to 2006.

(15) Numerous United States and indigenous private voluntary organizations, including faith-based organizations, provide assistance to orphans and other vulnerable children in developing countries. Many of these organizations have submitted applications for grants to the Administrator of the United States Agency for International Development to provide increased levels of assistance for orphans and other vulnerable children in developing countries.

(16) Increasing the amount of assistance that is provided by the Administrator of the United States Agency for International Development through United States and indigenous private voluntary organizations, including faith-based organizations, will provide greater protection for orphans and other vulnerable children in developing countries.

(17) It is essential that the United States Government adopt a comprehensive approach for the provision of assistance to orphans and other vulnerable children in developing countries. A comprehensive approach would ensure that important services, such as basic care, psychosocial support, school food programs, increased educational opportunities and employment training and related services, the protection and promotion of inheritance rights for such children, and the treatment of orphans and other vulnerable children with HIV/AIDS, are made more accessible.

(18) Assistance for orphans and other vulnerable children can best be provided by a comprehensive approach of the United States Government that—

(A) ensures that Federal agencies and the private sector coordinate efforts to prevent and eliminate duplication of efforts and waste in the provision of such assistance; and

(B) to the maximum extent possible, focuses on community-based programs that allow orphans and other vulnerable children to remain connected to the traditions and rituals of their families and communities.

SEC. 3. ASSISTANCE FOR ORPHANS AND OTHER VULNERABLE CHILDREN IN DEVELOPING COUNTRIES.

Chapter 1 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 et seq.) is amended by adding at the end the following section:

“SEC. 135. ASSISTANCE FOR ORPHANS AND OTHER VULNERABLE CHILDREN.

22 USC 2152f.

“(a) FINDINGS.—Congress finds the following:

“(1) There are more than 143,000,000 orphans living sub-Saharan Africa, Asia, Latin America, and the Caribbean. Of this number, approximately 16,200,000 children have lost both parents.

“(2) The HIV/AIDS pandemic has created an unprecedented orphan crisis, especially in sub-Saharan Africa, where children have been hardest hit. The pandemic is deepening poverty in entire communities, and is jeopardizing the health, safety,

and survival of all children in affected countries. It is estimated that 14,000,000 children have lost one or both parents to AIDS.

“(3) The orphans crisis in sub-Saharan Africa has implications for human welfare, development, and political stability that extend far beyond the region, affecting governments and people worldwide.

“(4) Extended families and local communities are struggling to meet the basic needs of orphans and vulnerable children by providing food, health care including treatment of children living with HIV/AIDS, education expenses, and clothing.

“(5) Famines, natural disasters, chronic poverty, ongoing conflicts, and civil wars in developing countries are adversely affecting children in these countries, the vast majority of whom currently do not receive humanitarian assistance or other support from the United States.

“(6) The United States Government administers various assistance programs for orphans and other vulnerable children in developing countries. In order to improve targeting and programming of resources, the United States Agency for International Development should develop methods to adequately track the overall number of orphans and other vulnerable children receiving assistance, the kinds of programs for such children by sector and location, and any other such related data and analysis.

“(7) The United States Agency for International Development should improve its capabilities to deliver assistance to orphans and other vulnerable children in developing countries through partnerships with private volunteer organizations, including community and faith-based organizations.

“(8) The United States Agency for International Development should be the primary United States Government agency responsible for identifying and assisting orphans and other vulnerable children in developing countries.

“(9) Providing assistance to such children is an important expression of the humanitarian concern and tradition of the people of the United States.

“(b) DEFINITIONS.—In this section:
